#### Vision

The “Vision” is the focal point for the entire plan! It provides a picture of what the person envisions for the future and may include the following: where they want to live or work, what they would like to learn, what social opportunities they would like to be involved in or what interests they may wish to pursue. The “Vision” may be written for a one to three year period and may be written in a narrative statement or in short phrases. “Actions”, “Outcomes” and “Implementation Strategies” must relate to the Personal Support Plan “Vision” statement.

#### Outcomes

Define what the person wants to accomplish or have happen. They are written in the Persons own words and are directly related to the person’s “Vision” and must be agreed upon by the person whose plan it is, when appropriate. They are not service driven but reflect the outcome of the service or support. They are not always achieved in measurable and quantifiable ways. If it is determined that they need to be measurable to assure progress an “Implementation Strategy” may be developed.

### Actions

"Actions" support the achievement of an "Outcome" and are developed at the Personal Support Planning meeting by the team. "Actions" list the specific and sequential steps required to accomplish the outcomes. "Actions" answer the questions: "How do I get there?" and "How will it be accomplished?"

"Actions" must include the following:

3. A notation in the "Action" if an 'Implementation Strategy' is necessary.
4. The date written for the start and completion of the "Action" under the column for start and completion dates.

### Implementation Strategies

"Implementation Strategies/Plans" are developed after the meeting by the responsible party in order to complete the Action. "Implementation Strategies" describe those things the individual will need to learn in order to achieve an "Outcome". They are written when the person is expected to learn a skill or accomplish something to assist the person in achieving a desired "Outcome". "Implementation Strategies" are developed based on formats designed by the Provider.

Implementation Strategies must include:

An amendment to the Personal Support Plan must be completed and a meeting scheduled when:

#### Decision Making

Decisions about the Personal Support Plan are made by the service providers (providing the services needed), the individual in services, his/her legal guardian and the Case Manager/QMRP and other team members as appropriate. Decisions are based on what the person's vision for the future is and what supports the provider is able to offer towards achievement of the person's "Vision". Health and safety of the service recipient must be assured and must be considered in the decision making process.

When making decisions the Personal Support Planning team members must take into account:

1. The Individual's Rights, Developmental Disabilities Policy #01.03.411
